## Wide range of Flash drives available from Comsol

Ideal for virtually any portable storage needs, the new [Comsol](#) flashIT2 range provides for easy transfer of documents, presentations, pictures, music and more between work, home or anywhere else.

With a durable and slim aluminium casing and extra security features, the flash drives allow valued data to be transported with full confidence.

They plug directly into any standard USB port, are compatible with both PC and Macs and need no drivers unless operating under Windows 98SE. They also feature effective password security control to prevent unauthorised access.

A major feature of the flashIT2 drives is the included Carry it Easy +Plus software.

An ideal 'road warrior' tool, it makes it easier to stay mobile, synchronising email data, favourites, files, folders and even the desktop.

With its portable Microsoft Outlook Express, it facilitates sending and receiving emails from any computer that has Windows, and 'No Trace Browsing' ability in Internet Explorer and Firefox delivers more privacy to visit personal favourites.

The software offers interface and functions that are particularly easy to use from the intuitive initial configuration process to the No Trace Browsing every step takes only a few clicks.

The new Comsol flashIT2 drives are available in a variety of capacities from 128Mb to 8Gb and support Windows 98SE/ME/2000/XP and Vista as well as Mac OS 9.1 and Linux 2.4.0 or higher.
