

ATP USB mini ToughDrive and CoSoSys Team Up

The CoSoSys Carry It Easy software we recently reported will now be found, pre-installed, on the [ATP USB ToughDrive](#). The preloaded CoSoSys software will allow for quick and easy sync of email, contacts and personal bookmarks.

If not familiar with the [ATP ToughDrive](#), it's a ruggedized flash drive designed to withstand water, dust, static discharge and extreme temps.

Include the [Secure It Easy](#) software from CoSoSys and now you're not only portable but iron-clad secure too.

Source: [CoSoSys](#), thanks Cristina!
