**New York's Astor Services For Children & Families Selects CoSoSys to Protect its Endpoints**

**Bronx-based non-profit organization Astor has chosen Endpoint Protector to secure its network against portable storage and li**

JULY 22, 2009 -- DMN Newswire--2009-7-22--CoSoSys, vendor of the most innovative and effective applications for portable storage devices and endpoint security solutions, has been recently selected by the Astor Services For Children & Families to protect its network from the threats embedded by portable storage and lifestyle devices. Astor has selected the Endpoint Protector solution to increase its security and protect their network from both inside and outside threats and to comply with specific regulations of the State of New York.

Founded in 1953, Astor promotes the well-being of children, adolescents and their families through a range of programs that prevent and treat emotional problems and facilitate healthy development. The NGO has 300 PCs in its network and aimed to completely secure all USB devices in their environment. Moreover, as Astor is funded by the State of New York, they needed to prove compliance with Confidentiality and Privacy regulations. Endpoint Protector was the perfect fit for their requirements.

"We strongly believe Endpoint Protector is the best endpoint security solution in the market and also is the most flexible when it comes to costs. By implementing it, we succeeded in creating a safe environment, while taking full advantage of the portable devices our day to day activities required," explained Glenn Ungaro, Astor Network Security Manager.

"As the risk of data loss, data leakage and data theft increases every day, both businesses and NGOs need to proactively monitor and regulate the use of portable devices, especially since they are currently vital to an efficient work flow. Endpoint Protector enables such companies to both secure their network and comply with local, countrywide and industry standards regarding data breach management and IT governance," concluded Roman Foeckl, CEO of CoSoSys.

Endpoint Protector is a best-of-breed DLP (Data Loss Prevention) and removable media device control solution designed to minimize internal threats, reduce data leakage risks and proactively control devices connected to the endpoints. It allows IT departments to proactively take control of the device internal use, while tracking all data transferred in or out of the protected network and enforcing encryption of the data in transit on portable devices. Endpoint Protector is available as a free 30 day trial or online demo at <http://www.EndpointProtector.com>. Endpoint Protectors low TCO and support for both Windows and Linux Server Platforms makes it an excellent choice for NGOs and businesses alike.

Supported Operating Systems

Client: Windows XP/ 2003/Vista (32 and 64 bit)/Windows 7 Server: Windows 2003 Server, Linux; Debian, Red Hat, Fedora  
Devices supported

USB flash drives, memory cards, internal and external CD/DVD players/burners, internal and external hard and floppy disk drives and card readers, ZIP drives, digital cameras, smart phones, BlackBerry, iPods and other MP3 players, FireWire devices, biometric drives, Bluetooth devices, printers, ExpressCards, Wireless USB, webcams. Additional devices will be added as they become popular.

About CoSoSys

CoSoSys specializes in network endpoint security and development of software for portable storage device enhancement. The application portfolio includes functions from device control, password security, data synchronization and network security. CoSoSys distributes its products globally through leading hardware manufacturers, software distributors, resellers and directly to users at <http://www.CoSoSys.com> and <http://www.EndpointProtector.com>. CoSoSys has offices in Germany, the United States and Romania, and enjoys a continuously growing installation base of users worldwide.

About Astor

Astor Services For Children & Families is a community based, non-profit organization that provides children's mental health services, child welfare services, and early childhood development programs. Astor serves children and families in New York State's Mid-Hudson Valley region and the Bronx.

Now serving over 6,000 children and families annually, Astor's current range of services offered include: Residential Treatment, Therapeutic Foster Family Care, Early Childhood Programs, and Community Based Mental Health and Educational Services. For more details, please visit: [www.astorservices.org](http://www.astorservices.org).

### How to make a perfect wedding slideshow DVD

If you've been to a wedding ceremony in recent years, you've probably seen a wedding photo slideshow, most often running in DVD Player or PC. This tutorial tells you how to make a perfect wedding slideshow dvd for lifetime memories. [Read More](#)

### Content Insider #127-- Too Much Advice

You have to love today's social media. Ok you don't have to love it because there is so darned much of it and it has empowered people. Problem is some people just shouldn't be empowered. Heck some should have their computers unplugged and their smartphones confiscated. But sites and blogs have done an excellent source of how-to (how-to install, how-to use, how-to fix, how-to replace, how-to get action) information. Just reach out and ... [Read More](#)

### Content Insider #126--The Real Power

The multitasking female makes the decisions even when she allows (manipulates) the male to make the decision. Fortunately some firms are seeing the light and learning how to tap into the mind of the family power maker and decision shaper. The Kill Bill Vol 1 and Kill Bill Vol 2 movies proved to us that she might look meek and mild but boy don't tick her off because if you do -- BIFF! BAM!! BOP!!!! POW!!!! [Read More](#)

### Intego Software

With the ever-increasing popularity of Mac hardware, it's not unusual to hear that it's becoming the target of hackers and viruses. Historically touted as the operating system without viruses, the MacOS has been a dream for all of us Mac users -- especially those of us who prefer not to worry about security software. In the early days of the MacOS, there were a few different choices for the few of us who even bothered to run software to protect ourselves from viral attack. [Read More](#)
