

Press Release

Endpoint Security Developer CoSoSys included in Deloitte Technology FAST 50

CoSoSys is now part of one of the most prestigious tops of technology companies in Central Europe that rewards growth and innovation

Bucharest, October 18, 2011. Endpoint security, device control and data loss prevention solution developer CoSoSys has been included in Deloitte's prestigious top of growing technology companies from Central Europe, the Deloitte Technology FAST 50 2011. This year marks the 12th edition of Deloitte's list, which ranks Central European companies in the technology field based mainly on their intellectual property, thus rewarding their innovative contributions to the industry.

The inclusion of CoSoSys in this year's FAST 50 top recognizes and rewards the company's history of strong growth since its foundation in 2004. Their commitment to provide companies of all sizes with security solutions for Windows and Mac platforms, which offered effective protection against all threats that define the modern, mobile and connected business environment, powered CoSoSys evolution from a small developer of software for portable device enhancement to a top innovator in the endpoint security business.

CoSoSys has also orchestrated their share of world premieres in the data loss prevention (DLP) and endpoint security field, releasing the world's first cloud computing solution for device control and network security, My Endpoint Protector, and later the equally popular Endpoint Protector Hardware Appliance, the first out of the box hardware appliance for endpoint, device and data security.

"We are extremely proud to be included in such a prestigious list of technology companies from Central Europe, a welcome recognition of our role as innovators in the security business," said Roman Foeckl, CoSoSys CEO. "Being part of Deloitte Technology FAST 50 2011 will further support our efforts of delivering new, comprehensive and reliable endpoint security and DLP solutions that prevent existing and emerging threats due to the increased use of portable devices and help companies save time and money and invest them in achieving business growth".

"Being part of the Deloitte Technology FAST 50 proves our ability as a young IT security vendor to grow even in difficult economic times. I am sure that we can outperform our past results in the years to come due to the increased demand for our innovative products," added Michael Bauner, CoSoSys Senior VP.

Apart from owning intellectual or technological property, a company considered for the competitive Deloitte Technology FAST 50 list has to prove their property has been a major contributor to their incomes, generating significant business for the developer in question, or that a significant part of their earnings is allotted to research and development. Annual income, experience on the marketing and overall business dynamics are also important factors in deciding which technology companies from Central Europe are included in the yearly top. The Deloitte Technology FAST 50 2011 list is available here <http://www.deloitte.com/fast50ce>.

CoSoSys' products and technologies are currently being used by more than 20 million users and portable devices worldwide. All CoSoSys software solutions can be tested for free at <http://www.EndpointProtector.com>.

About CoSoSys

CoSoSys is specialized in network endpoint security for Windows and Mac and development of software for portable storage device enhancement. The application portfolio includes functions from password security, data synchronization and network security. CoSoSys distributes its products globally through the world's leading hardware manufacturers, software Distributors, Resellers and directly to users at <http://www.EndpointProtector.com> and <http://www.CoSoSys.com>. CoSoSys enjoys a continuously growing installation base of users worldwide. The company has offices in Germany, the United States and Romania.
