

Press Release

Endpoint Protector Hardware Appliance, Finalist in Info Security Products Guide's Global Excellence Awards

Endpoint Protector Hardware Appliance became one of the finalists of the Endpoint Security category two months after its official release in late October 2010

Bucharest, January 20, 2011. Only two months after its market release, the Endpoint Protector Hardware Appliance developed by CoSoSys is a finalist in the Endpoint Security category of the 2011 Global Excellence Awards organized by Info Security Products Guide, the industry's leading information security research and advisory guide. These prestigious global awards praise exceptional security and IT vendors for their advanced, groundbreaking products and solutions that are helping set the bar higher for others in all areas of technologies.

Designed for companies of all sizes, with computer networks ranging from 50 to over 5000 units powered by both Mac and Windows operating systems, the Endpoint Protector Hardware Appliance keeps businesses safe from all security threats posed by high portability and mobility, preventing data loss and theft, data exposures and other security breaches that commonly occur when portable storage and lifestyle devices are part of the work process. Once plugged in, the Endpoint Protector Hardware Appliance is set up in under five minutes and protects companies from all the above risks by enabling them to take control of internal device usage, track all data transferred in or out of the protected network and enforce encryption of data in transit on portable devices, all through a central Web-based management interface.

"Having the Endpoint Protector Hardware Appliance named finalist in such a prestigious competition so soon after its release in the market is a recognition of our solution's performance, competitiveness and ability to respond to the real endpoint security and device control needs of the business world," said Roman Foeckl, CoSoSys CEO. "We are extremely proud and happy of what we have accomplished and we will continue to develop data and endpoint security solutions that effectively tackle the challenges of the global business world, while helping companies save time and money to keep ahead of their competitors."

The Info Security Products Guide Global Excellence Awards recognize and honor excellence in all areas of information security. The 2011 edition rewards top of the line products in over 30 categories, along with the best companies and professionals in the IT field. The winners of the competition will be announced at the Awards Dinner held in San Francisco on February 16, 2011.

About Info Security Products Guide Awards

Info Security Products Guide sponsors leading conferences and expos worldwide and plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and market research that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honour excellence in all areas of information security. To learn more, visit www.infosecurityproductsguide.com and stay secured.

About CoSoSys

CoSoSys is specialized in network endpoint security for Windows and Mac and development of software for portable storage device enhancement. The application portfolio includes functions from password security, data synchronization and network security. CoSoSys distributes its products globally through the world's leading hardware manufacturers, software Distributors, Resellers and directly to users at <http://www.EndpointProtector.com> and <http://www.CoSoSys.com>. CoSoSys enjoys a continuously growing installation base of users worldwide. The company has offices in Germany, the United States and Romania.
