Press Release

Inter Engineering to Distribute Endpoint Protector 2008 in the Balkans

Inter Engineering and CoSoSys announce the closure of a distribution partnership for the Endpoint Protector 2008 software and related services in Balkan countries

Larissa, GR and Bucharest, RO, 12. May 2008 – Inter Engineering, one of the main players on the data security market in the Balkans, and CoSoSys, vendor of network endpoint security and portable storage device enhancement solutions, announce today their strategic partnership to distribute the Endpoint Protector 2008 solution and additional support services in Greece, Cyprus and Malta. The distribution agreement between Inter Engineering and CoSoSys comes as a natural response to the increasing demand in Balkan countries for the numerous business and technical benefits that CoSoSys technology delivers.

In a world where the use of portable and lifestyle devices like USB Flash Drives and MP3 Players is increasingly transforming the way people work and live, Endpoint Protector 2008 is designed to maintain productivity and make work and life more convenient, secure and enjoyable.

Employees play a key role in a company's security and yet many workers do not understand the danger of removable storage devices. The threats embedded in portable devices can reach even institutions that place a great focus on security policies, such as the army. In 2006, flash drives containing classified US military secrets turned up for sale at a marketplace in Afghanistan. Shopkeepers claimed the kit was sold to them by cleaners, garbage collectors and other local workers at the nearby US airbase as LA Times, quoted by IT portal The Registrar, reported at the time, flash memory drives from the base were being sold in second hand bins.

Endpoint Protector 2008 dramatically reduces the risk posed by internal threats that could lead to your confidential data being leaked, stolen, damaged or otherwise compromised.

"The developments in enterprise needs make Endpoint Security an indisputable part of a solid Policy" said Josmaarten Swinkels, CEO of Inter Engineering. "CoSoSys provides solutions which combine quality with flexibility and an attractive pricing model fitting extremely well in Inter Engineering's solutions portfolio. We are happy to work with CoSoSys and optimistic about the future."

"Inter Engineering has proven to be an absolute first-rate partner committed to the success of our customers," said Roman Foeckl, director of CoSoSys. "We are pleased to have such a reputable and experienced company representing us in their home market."

The distribution agreement also represents CoSoSys entry into the Inter Engineering marketplace. Working with Inter Engineering will leverage the company's comprehensive knowledge of local markets to provide fulfillment and delivery services as well.
