USB-Firewall

– taking control where your data goes

takeMS MEM-Drive Firewall assures that only an authorized USB Flash Drive can be used to transfer data.

takeMS announces the launch of the MEM-Drive Firewall flash drive. This takeMS MEM-Drive comes together with the USB-Firewall software “Secure it Easy” that protects PC ports.

With the MEM-Drive Firewall, businesses and individuals are now able to control the use of portable storage devices on their PCs. MP3 Players, USB Flash Drives, portable hard disks or digital cameras are everywhere around us. Most network administrators and PC users are not protecting their IT environment against threats that these devices pose to notebooks, desktop PCs and networks. A disgruntled employee could be tempted to smuggle company data out of the office, or somebody that involuntarily carries virus-infected files to the office on their Flash Drive could infect the company network, can now be stopped.

With the USB-Firewall software installed and configured on a PC only the PCs administrator is able to give permissions to use certain portable devices on the protected PC. These portable devices are stored in a white list and classified as “TrustedDevices”. One TrustedDevice is the takeMS USB-Firewall Flash Drive that can be authorized for use on the PC assuring that the data is transferred only to a safe device. In case of an unauthorized device, being connect to the PC the administrator will

receive an automatic e-mail notification regarding the attempted security breach.

On the portable MEM-Drive Firewall the data is protected by 128bit AES encryption with the Carry it Easy +Plus takeMS Edition software assuring that even in cases when a MEM-Drive Firewall gets lost or stolen, the data on it will remain protected.

“takeMS MEM-Drive Firewall allows companies to deploy an easy and cost efficient endpoint security solution to take control of who and how company data is transferred to portable storage devices”, said Edmund Dägele, CEO & President of takeMS.

takeMS MEM-Drive Firewall takes control of your data while it is on your PC or on your portable MEM-Drive, assuring that it is always protected. It is offered in 512 MB to 8 GB capacity. The price for 1 GB takeMS MEM Drive Firewall will be nearly 35 Euro ex. VAT. The Secure it Easy software is compatible with Windows Vista, Windows XP and Windows 2000 (SP4).

Since July 1st, 2006, the takeMS AG is acting as an independent company on the world market. Up to now, more than 5 million takeMS memories had been sold in more than 40 countries. Therewith, takeMS is the leading manufacturer for memory products. Rapid, mobile, safe and available: memories need to work and to make you available your data always and anywhere. For this reason, takeMS has defined the demanding German quality guidelines as its standard. National and international awards of the takeMS products are certifying the young company in its high demand. Being convinced of our products, the takeMS therefore is granting a guarantee of 10 years on random access memories and a total of 5 years on the innovative flash and USB products.
