

Endpoint Protector 2009™

Device Control and Data Loss Prevention for businesses

Windows XP/Vista/7 Client Version: 3.0.7.3 Windows 2003/2008 Server Version: 3.0.4.1
Mac OS X Version: 1.0.4.4 Linux Server Version: 3.0.4.1

Your data is only as safe as your endpoints.

Endpoint Protector 2009 provides a policy based approach to enforce the portable device usage rules on endpoints.

It is the only solution to offer protection for PCs and Macs.

In a world where portable and lifestyle devices are transforming the way we work and live, Endpoint Protector 2009 is designed to maintain productivity and make work more convenient, secure and enjoyable.

The whitelist based approach allows the use of specific devices for certain users/groups so that they stay productive while maintaining control of what devices are used and what data users are allowed to transfer.

Endpoint Protector 2009 dramatically reduces the risk posed by internal threats that could lead to data being leaked, stolen, damaged or otherwise compromised.

Controlled Endpoint Device Types:

- USB Flash Drives
(Normal USB Drives, U3, etc.)
- Memory Cards
(SD, MMC, CF, etc.)
- CD/DVD-Player/Burner
(internal and external)
- external HDDs
- Floppy Drives
- Card Readers (internal, external)
- ZIP Drives
- Digital Cameras
- Smartphones/BlackBerry/PDAs
- iPods/iPhone
- FireWire Devices
- MP3 Player/Media Player Devices
- Biometric Drives
- Bluetooth Devices
- Printers
- ExpressCards (SSD)
- Wireless USB

Endpoint Protector 2009 Firewall between PC and Devices

Endpoint Protector enables companies to better comply with internal device usage policies, regulations and standards regarding data security, data breach management and IT governance.

Enforcing encryption of your data in transit using TrustedDevices.

Endpoint Security for Workstations, Notebooks and Netbooks

Protection against threats posed by removable portable devices. Stops intentional or accidental leakage, theft, loss, or malware infection of data.

Device Management / Device Control

Defines the rights for devices / users or computers in your network.

Centralized web based Management / Dashboard

Centrally manages the use of removable portable devices. The web based Administrative & Reporting interface meets the needs of management and IT security staff and offers real-time information about organization wide controlled devices and data transfer activity.

File Tracing / File Shadowing

File Tracing records all data that was copied to and from previously authorized devices. *File Shadowing* saves a copy of all files, even of deleted ones, that were used in connection with controlled devices.

File Whitelisting

Only authorized files can be transferred to authorized devices. All other files are blocked and attempted transfers are reported.

Device Activity Logging – Audit Trail

Device activity logs are saved for all clients and devices connected giving a history of devices, PCs and users for audits and detailed analysis.

Reporting and Analysis

Powerful reports, graphics and analysis tool to easily review activity.

Easy Enforcement of Your Security Policies (Active Directory)

Simplified device management policies with customizable templates for defined User Groups (Active Directory GPOs) allow easy enforcement and maintenance of security policies across your network.

Temporary Offline Password / Network "Offline" Mode

Secured PCs that are disconnected from the network stay protected. To keep productive on the road, devices can be temporarily allowed via the Temporary Offline Password functionality.

Endpoint Protector Client Self Defense

Provides protection even on PCs where users have Administrative rights.

Enforce endpoint security policies and take control of how and by whom data is transferred.

SYSTEM REQUIREMENTS

Client(s)

- Windows 7 (32/64bit)
- Windows Vista (32/64bit)
- Windows XP (SP2) (32/64bit)
- Windows 2003/2008 (32/64bit)
- Mac OS X 10.4+
- .Net 2.0 Framework
- min. 32 MB of HDD Space

Server

Supported Operating Systems:

- Windows 2003 Server
- Windows 2008 Server
- Debian (*Ubuntu), Red Hat (Fedora, CentOS), Suse

Supported Web servers:

- IIS 6.0 / 7.0 or
- Apache (Version 5 or newer)

Supported Databases:

- Microsoft SQL 2005/2008 (Exp.)
- or MySQL (Version 5 or newer)

Additional Server Requirements:

- PHP (Version 5) with SOAP support
- OpenSSL Version 0.9.8

Directory Service

- Active Directory

Easy setup through established MSI deployment mechanisms.

Endpoint Protector server is compatible with different server platforms to assure a fast and cost efficient integration with the existing infrastructure.

The intuitive web based interface allows an efficient management.

Endpoint Protector offers you a safe and secure working environment with portable storage and endpoint devices. User efficiency is not restricted since any authorized device can be used continuously on protected PCs while the network's endpoint security policy is enforced.

Enforced Encryption - protecting sensitive data in transit with EasyLock TrustedDevice Technology

The TrustedDevice technology is designed to certify that in the protected environment all the endpoint devices are not only authorized and controlled via endpoint software and security policies, but also certified and trusted for protecting sensitive and confidential data in transit. This will assure that, in the event a device is stolen or lost, all the data stored on it is encrypted and therefore not accessible for other parties.
